Customer testimonials

"With the help of Authentic, Cuscal will truly own its payments platform and will be able to independently control the future functionality of the switch without recourse to the system vendor"

"Authentic's configurability will enhance e-Global's agility and responsiveness, enabling us to very rapidly roll out new products and services"

"We are very happy with Authentic, particularly its flexibility which allows us to radically differentiate ourselves from the competition in terms of rapid introduction of new products and services"

"We wanted a global solution that could provide seamless connectivity to the Faster Payments network. The team at NCR showed real partnership in supporting our new designs, and with two UK banks already in delivery we know we have a winning combination to service the growing market of Faster Payments"
